

# AIDAN MCKAY

---

## SOFTWARE DEVELOPER

785-438-9388 • [aidanmckay2000@gmail.com](mailto:aidanmckay2000@gmail.com) • <https://github.com/JellyBeans1312>

I am passionate about solving problems and bringing new ideas to life and have been developing since my freshman year of High School. I want to join a diverse team where I can combine my passion for problem solving with my positive attitude to build great products.

---

## PROJECTS

### Agency — <https://github.com/JellyBeans1312/Agency-fe>

Agency is a real world application that connects abled citizens to the disabled with the intent on helping the disabled with tasks that they cannot necessarily do on their own. This project uses technologies like React Hooks, Styled Components while using Python and Flask in the back end. Tested with Jest / Enzyme

This project placed 1st in a Denver Demo Competition.

### Tune In Later — <https://github.com/JellyBeans1312/Tune-In-Later>

Tune In Later gives you the chance to search for your favorite albums from within the application and, once logged in, save your favorites to your account. New users are encouraged to create an account in order to join the fun and save their favorites. Built with ReactRouter, Redux, PropTypes. Tested with Jest / Enzyme.

### SWAPI-BOX — <https://github.com/JellyBeans1312/SWAPI-BOX>

This Star Wars project creates the opportunity for a Star Wars fan to keep track of their favorite Characters, Planets, and Vehicles. Built with ReactJS, React Router, Async Testing, and Promise.all methods. Tested with Jest / Enzyme.
